

Silca Transponder Program

Silca Transponder Program is a computer based collection of transponder keys distributed by Silca. It provides information for making a valid copy of an electronic key. When it is not possible to make a copy instructions are given for adding a new key to the immobilizer unit on a selected vehicle.

The devices run are:

RW4, RW4 Plus, Fast Copy, Fast Copy Plus, RW3, RW2 and RW100.

Other important utilities:

- Electronic code generation
- Manual entry of an electronic code
- Initialization of blank transponders not pre-coded
- Customization of the list by selecting columns
- Software and document updates for RW devices, to download from the internet through Silca Remote Service
- Saving the electronic code in the customer historic archive.
